Terminal Disclaimer

1. The terminal disclaimers filed on 2-1-06 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Applications, serial numbers 10/807,143 (currently U.S. Patent 6,958,847) and 10/810,660 (currently still pending) were reviewed previously and had been accepted. The terminal disclaimers are still recorded and remain in effect.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the amended drawing sheet for Figure 4D, the arrow relating to element 420 was redirected to indicate the space, as opposed to the top layer (the layer is already labeled as 414). These changes were necessary to more properly coincide with the description of the invention, i.e. avoid confusion.

In order to avoid abandonment of the application, applicant must make these above drawing changes.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The prior art does not show or fairly suggest the claimed invention of an optical interference display unit having the claimed structure and claimed limitations, wherein a rejection under 35 USC 102 or 103 would be improper. Please particularly note the combination of claimed elements and claimed limitations, especially including a second electrode, in parallel with the first electrode and having a material layer and a conductive layer on the material layer, as well as a support structure partially covered by the second electrode and supporting an edge of the second electrode, and wherein the material of the conductive layer is more difficult to be etched than a material of the material layer.

Therefore, in light of the Applicants' arguments (filed on 2-1-6, on page 2) and the amendments (filed on 2-1-06), the claimed invention is considered to be in condition for allowance as being novel and nonobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because of the indicated change made to Figure 4D. Applicant is advised to

employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Information Disclosure Statement

5. Accordingly, the information disclosure statement has been considered by the Examiner, to the extent possible in view of the long list of documents. The Applicants should note that it is desirable to avoid the submission of long lists of documents if it can be avoided. Eliminate clearly irrelevant and marginally pertinent cumulative information. If a long list is submitted, a highlight of those documents which have been specifically brought to the Applicants' attention and/or are known to be of most significance would be helpful to avoid possibly missing such a significant reference.
